

Rubber Screens

Rubber screens offer excellent resistance to impact and abrasion.

A three-ton boulder is no problem for these tough rubber Grizzly Screens.

Rubber scalping screens designed for high impact materials.

Rubber screen panels provide excellent resistance to impact and abrasion in scalping applications and coarse dry screening. Rubber screen panels cost less than polyurethane and generally outlast conventional wire cloth or steel plate. You get low maintenance and high cost efficiency in applications that are too severe for conventional wire cloth.

Steel-backed rubber screens

Ideally suited for scalping applications.
Rubber molded on full steel plate.

- 1" to 10" openings, square, round or slotted
- 1" to 5" thick, 1/4" to 1/2" steel back

Steel frame / cable-reinforced screens

For medium impact/high wear applications.
Rubber molded on steel frame or reinforced with galvanized aircraft cable.

- 1/2" to 2" openings, 1" to 2" thick

Fabric-reinforced screens

For low impact/high wear applications.
Rubber reinforced with nylon/polyester fabric.

- 1/4" to 2" openings, 1/4" to 2" thick
- Modular systems available in 1' by 2' or 1' X 4' with 1/2" to 6" openings, 41mm thick, or 70mm thick

Features:

- Extended wear life in dry applications
- High impact resistance
- Low maintenance
- Rubber vulcanized with steel plate recommended for heavy and high impact applications

Benefits:

Toughness — Rubber will absorb and bounce back from high impacts that would shatter AR plate or comparable materials.

- 30 to 70 durometer wear resistant rubber
- Bolt down, hooked or snap-in
- Available with or without skid bars
- Special hole patterns available

Durability — In impact and wear applications, rubber screens can outlast wire screens by a factor of 10-1

- Used to protect chutes, hoppers and other high wear areas
- Effective at feed end / high impact areas

Flexibility — Rubber's natural elasticity will substantially reduce material build-up and blinding. Unified also offers a proprietary graphite compound to virtually eliminate wet, sticky build-up.

- Easy installation and replacement
- Used in feeder bins, chutes, feed / discharge lip liners
- Eliminates clean-out downtime

Other products and accessories:

- Rubber feed plates
- Rubber canoe liners
- Rubber chute liners
- Rubber clamp rails
- Rubber feed cone liners and hoppers

What can we manufacture for you?

Unified rubber screens are custom-made to fit your existing application; bolt-down, hooked, flat or crowned. We can supply full screens or modular panels to fit most existing sub-frame systems from 1' x 2' to 1' x 4'.
